Corsair 36

# Corsair

It is difficult  
to believe that a  
sports boat this  
comfortable can  
be this quick.

# 36

# Corsair

The Corsair 36 offers all of the style and elegance of a covered forward deck boat and all the comfort and space of an express cruiser. Perfect for weekend trips and longer excursions, this is the only Corsair that sleeps four in complete luxury. The spaciousness of its salon, cabin and cockpit are complemented by the uncompromising craftsmanship of its owner's cabin. Belying its size, the Corsair 36 is a responsive and powerful boat that is supremely enjoyable to drive. The impression it makes on those who see it is only exceeded by the impact it has on those who experience all it has to offer.

# 36

Corsair

36

The Corsair 36 is a boat for all seasons and all reasons. It is the synthesis of everything we've learned about building boats.

# Corsair

36

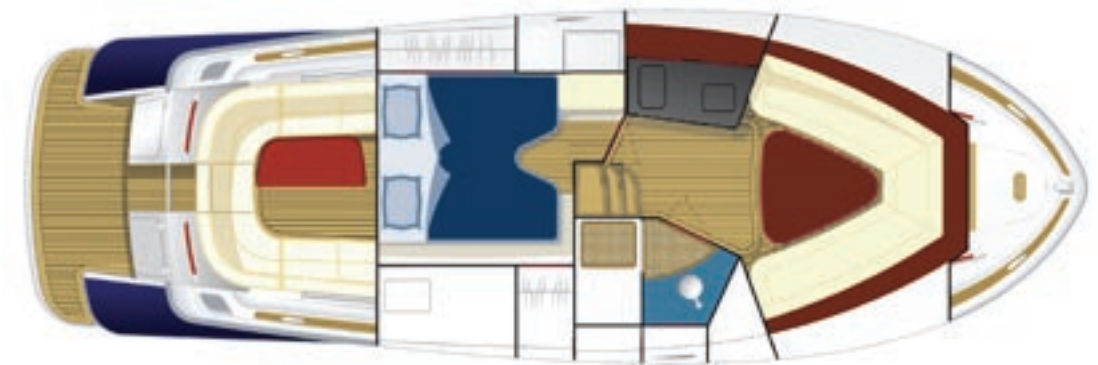

# Corsair

As you'd expect, the exterior and interior wood fully lives up to Chris-Craft's traditional standards of excellence.

# 36

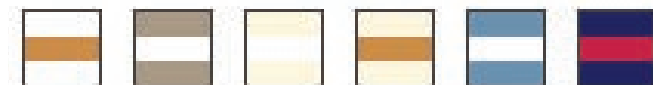

The countless hours that have gone into the design of the Corsair 36's stateroom, galley and head ensure that the time you spend within its spectacular interior will be time well spent. The forward cabin area of the Corsair 36 provides a full 6'2" of head room. There is also a separate stateroom with queen size bed at the rear making this a boat that sleeps 4 comfortably. As you'd expect, the exterior and interior wood fully lives up to Chris-Craft's traditional standards of excellence. Wherever you go, this Corsair is a place where you will always want to return.

The Corsair 36 offers unprecedented interior space and luxury for a boat of this type. This boat comes standard with a salon entertainment package that will keep you occupied below decks during weekend excursions. An aft entertainment package is also available as an option. And the Corsair 36 packs plenty of power. The boat comes with standard twin V-8 engines with 840 hp. Alternatively, you can specify a range of Volvo or Mercruiser engines with up to 850 hp. Diesel engine options are also available. Once you step aboard, you will realize that nothing compares to the first time you drive a Corsair, except for the next time and the time after that.
